DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP Patent publication 09238423.

In regard to claims 1, 7-8, JP device discloses a heat-shrinkable shrink tube (see figs. 1-4) for an electrical power cable comprising; a sleeve at 20, 30, or 12 having an electrically insulating inner layer, an electrically conductive outer layer, and between the inner and outer layers a thermoplastic mid-layer at 10 which can be softened by application of heat to the-said sleeve permit dimensional recovery thereof, in that the sleeve being of tubular, one-piece construction and the thermoplastic mid-layers supporting the electrically insulating. The term can as recited in the claims is objected to because it's not a positive limitation. It does not add any patentability to the claims limitations. However, JP device fails to explicitly disclose the size of the different layers. It would have been obvious matter of design choice to have the layers being of certain size, since such modification would have involved a mere change in the size of a component. A change in size for a multiplied effect is generally recognized as being within the level of ordinary skill in the art. In re Rose, 105 USPQ 237 (CCPA 1955).

Art Unit: 2839

In regard to claims 2-6, JP device discloses the aforementioned, but fails to explicitly the material of the layers. It would have obvious to one having ordinary skill in the art at the time the invention was made to have the layer being made of certain material, since it has being held to be within the general skill of worker in the art in the art to select known a material on the basis of suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416. It would have been obvious to one have ordinary skill in the art at the time the invention was made to have the layer made of certain material in order to meet the system specification and requirement.
